Assignment 11:

Write a C program that defines a structure Student containing the attributes rollNumber, name, and marks. Include a user-defined function named displayStudent with the signature void displayStudent(struct Student s);. The function should display the details of a student.

Source Code:

```
#include<stdio.h>
struct Student {
   int rollNumber;
   char name[100];
   float marks;
};
void displayStudents(struct Student s) {
   printf("\nStudent Details :");
   printf("\nName           : %s",s.name);
   printf("\nRoll Number     : %d",s.rollNumber);
   printf("\nMarks Obtained  : %.2f",s.marks);
}
int main() {
   struct Student s;
   printf("Enter the name of the student : ");
   scanf(" %[^\n]",s.name);
   printf("\nEnter the Roll Number of the student : ");
   scanf("%d",&s.rollNumber);
   printf("\nEnter the Marks of the student : ");
   scanf("%f",&s.marks);
   displayStudents(s);
   return 0;
}
```

Output:

```
Enter the name of the student :Ram

Enter the Roll Number of the student :1

Enter the Marks of the student :99.99

Student Details :
Name            : Ram
Roll Number     : 1
Marks Obtained  : 99.99
Process finished with exit code 0
```

```
Enter the name of the student :Shyam

Enter the Roll Number of the student :2

Enter the Marks of the student :98.09

Student Details :
Name            : Shyam
Roll Number     : 2
Marks Obtained  : 98.09
Process finished with exit code 0
```
