Assignment 15:

Write a C program that reads a sequence of integers from a file named 'input.txt'. This program should segregate the odd numbers from the even numbers and store the odd numbers in a new file named 'ODDFile.txt' while storing the even numbers in another file named 'EVENFile.txt'.

Source Code:

```
#include<stdio.h>
#include<stdlib.h>
int main() {
   FILE *fIn, *fEven, *fOdd;
   int n;
   fIn = fopen("input.txt","r");
   fEven = fopen("EVENFile.txt","w");
   fOdd = fopen("ODDFile.txt","w");
   if ((fIn==NULL)||(fEven==NULL)||(fOdd==NULL)) {
      printf("ERROR : one or more file opening FAILED!");
      if (fIn!=NULL) fclose(fIn);
      if (fEven!=NULL) fclose(fEven);
      if (fOdd!=NULL) fclose(fOdd);
      exit(1);
   }
   while (fscanf(fIn,"%d",&n)!=EOF)
      (n%2==0)?fprintf(fEven,"%d\n",n):fprintf(fOdd,"%d\n",n);
   fclose(fIn);
   fclose(fEven);
   fclose(fOdd);
   printf("OPERATION COMPLETED SUCCESSFULLY.");
   return 0;
}
```

Output:

```
OPERATION COMPLETED SUCCESSFULLY.

Process finished with exit code 0
```
